

NTA UGC NET AUG 2024 21st Aug to 04th Sep 2024

Application No	
Candidate Name	
Roll No.	
Test Date	30/08/2024
Test Time	9:00 AM - 12:00 PM
Subject	31 Linguistics

Section : General Paper

Comprehension:

The following table shows the percentage (%) distribution of viewers of JIO TV channel in five different towns (A, B, C, D and E) alongwith the number of viewers who subscribed the channel among them in the year 2023. Number of viewers in the town E is 1200. Based on the data in the table, answer the questions that follow.

Town-wise Details of Channel Viewers		
Town	Percentage Distribution of Channel Viewers	Number of Viewers who subscribed for the Channel
A	12%	440
B	15%	500
C	28%	880
D	25%	700
E	20%	360

Note: For each town, number of channel viewers is the sum of number of viewers who subscribed for the channel and the number of viewers who did not subscribe for the channel.

SubQuestion No : 1

Q.1

If out of the number of viewers from Town-C, $\frac{325}{7}\%$ are female and $\frac{7}{13}$ of the number of female viewers are unsubscribed viewers, then the number of unsubscribed male viewers from Town-C is.

1. 340
2. 360
3. 380
4. 420

Options 1. 1

2. 2
3. 3
4. 4

Question Type : MCQ

Question ID : 34212312530

Option 1 ID : 34212348809

Option 2 ID : 34212348810

Option 3 ID : 34212348811

Option 4 ID : 34212348812

Q.10

Match List I with List II

List I (n=number of trials p=probability of success)		List II (Variance of Binomial Distribution)	
A.	n = 7, p = 0.3	I.	1.44
B.	n = 5, p = 0.4	II.	2.00
C.	n = 8, p = 0.5	III.	1.20
D.	n = 6, p = 0.6	IV.	1.47

Choose the correct answer from the options given below:

1. A-I, B-II, C-III, D-IV
2. A-II, B-III, C-IV, D-I
3. A-III, B-IV, C-I, D-II
4. A-IV, B-III, C-II, D-I

Options 1. 1

2. 2
3. 3
4. 4

Q.30

What is the correct sequence of following drinking water treatment processes from initial to final?

- A. Filtration
- B. Disinfection
- C. Gravity settlement of large particles
- D. Flocculation

Choose the **correct** answer from the options given below:

1. A, B, C, D
2. A, B, D, C
3. C, D, A, B
4. C, D, B, A

Options 1. 1

2. 2
3. 3
4. 4

Question Type : MCQ

Question ID : 34212312565

Option 1 ID : 34212348949

Option 2 ID : 34212348950

Option 3 ID : 34212348951

Option 4 ID : 34212348952

Status : Answered

Chosen Option : 3

Q.31

Which of the following are true about class I and class II ozone depleting substances?

- A. Ozone depleting potential of class-I substances are far more than class II
- B. Ozone depleting potential of class II substances are far more than class I
- C. All chlorofluoro carbons belong to class II ozone depleting substances
- D. HCFC-21 belongs to class II ozone depleting substance
- E. Class-I contains fully halogenated gases

Choose the **correct** answer from the options given below:

- 1. A, D and E only
- 2. B, C and E only
- 3. A, C and D only
- 4. C, D and E only

Options 1. 1

- 2. 2
- 3. 3
- 4. 4

Question Type : MCQ

Question ID : 34212312564

Option 1 ID : 34212348945

Comprehension:

Read the passage carefully and answer the questions that follows:

A famine in China from 1958 to 1960 estimated to have killed about twenty-five million people. The reason why that's called a political crime-an ideological crime-which was discussed in most detail by Amartya Sen; it's part of the work for which he won the Nobel Prize. Sen is an economist who treated this as an ideological crime for food reasons. He said it wasn't a matter of intent; they didn't intend to kill anybody. It's just that the ideological instructions were such that it happened. It was a totalitarian state where no information about what was happening ever got back to the center. They couldn't take any action because that's what happens in a totalitarian state. So it was a reflection of the totalitarian instructions, a huge massacre that wasn't intended. They didn't intend to kill twenty-five million people, but it was still a major massacre, and it's correct to call it one of the major atrocities of the twentieth century, and the worst single component of the crimes of Communism.

SubQuestion No : 46

Q.46 According to the passage, how many people are estimated to have died in the famine in China?

1. 15 million
2. 25 million
3. 35 million
4. 45 million

Q.119

Match the List-I with List-II

LIST I (Concept)		LIST II (Explanation)	
A.	Complementary distribution	I.	Refers to the substitutability of one round for another in a given environment with no consequent change in the word's meaning
B.	Free variation	II.	Refers to a way of handling the problem of neutralisation of phonemes in certain positions in a word
C.	Archiphoneme	III.	Refers to the discovery procedures used in phonology to determine which sounds belong to the same class
D.	Minimal pair	IV.	Refers to the mutual exclusiveness of a pair of sounds in certain phonetic environment

Choose the **correct** answer from the options given below:

1. A-I, B-II, C-III, D-IV
2. A-III, B-IV, C-II, D-I
3. A-IV, B-I, C-II, D-III
4. A-II, B-III, C-IV, D-I

Options 1. 1

2. 2
3. 3
4. 4

Comprehension:

Read the following passage and answer the questions:

The study of the linguistic properties of the written language has lagged somewhat behind the study of the sounds of speech. Nonetheless, the efforts of typographers, graphic designers, linguists, psychologists, and others have introduced a number of useful distinctions and terms, some of which are designed to avoid the ambiguity inherent in the apparently simple term, writing. This ambiguity arises in several ways: Writing can refer to either a process or a result: while we are actively engaged in the process, we are said to be 'writing'; and when we have finished, the product (our composition or text) is also called (a piece of) 'writing'. Writing can refer to either an everyday or a professional activity. All literate people, by definition, can write; but only a tiny minority are writers (i.e. authors).

Written language, when contrasted with speech, refers to any visual manifestation of spoken language-whether handwritten, printed, typed, or electronically generated-and this is how the term is used in the present book. In this sense private letters, bus timetables, text messages, books are all examples of 'written text'. On the other hand, when people say 'I can't read your writing' they are referring only to handwritten (not printed or typed) text.

The writing system

Most obviously, writing is way of communicating which uses a system of visual marks made on some kind of surface. It is one kind of graphic expression (other kinds include drawing, musical notation, and mathematical formulae). In an alphabetic system, such as is found in English, the graphic marks represent, with varying regularity, individual speech sounds (or phonemes, p.248).

The standardized writing system of a language is known as its orthography. English orthography consists of the set of letters (the alphabet) and their variant forms (e.g. Capitals, lower-case), the spelling system, and the set of punctuation marks. The linguistic properties of the orthographic system can be studied from two points of view, analogous to the distinction used in spoken language between phonetics and phonology (p.248).

Graphics, a term coined on analogy with phonetics is the study of the way human beings make, transmit, and receive written symbols. However, unlike phonetics, where a comprehensive methodology for describing the properties of speech sounds has been developed, there is as yet no sophisticated graphetic classification, though typographers and printers have developed a limited terminology to handle the most salient features of letter shapes. Graphology, coined on analogy with phonology, is the study of the linguistic contrasts that writing systems express. In particular, it recognizes the notion of the grapheme, on analogy with the phoneme- the smallest unit in the writing system capable of causing a contrast in meaning. For example, *because* sat and *rat* have different meanings, <s> and <r> emerge as different graphemes; on the other hand, the contrast between *sat* and *sat* is not graphic because the graphic difference does not correlate with a change of meaning. Graphemes are usually transcribed in angle brackets. Punctuation marks (such as <.> and <?>) are graphemes also, as are such units as <2>, <&>, and <\$>.

SubQuestion No : 141

Q.141

The smallest unit in the writing capable of causing a contrast in meaning is called:

1. Character
2. Alphabet
3. Phoneme
4. Grapheme

Options 1. 1

2. 2

3. 3

4. 4

This ambiguity arises in several ways: Writing can refer to either a process or a result: while we are actively engaged in the process, we are said to be 'writing'; and when we have finished, the product (our composition or text) is also called (a piece of) 'writing'. Writing can refer to either an everyday or a professional activity. All literate people, by definition, can write; but only a tiny minority are writers (i.e. authors).

Written language, when contrasted with speech, refers to any visual manifestation of spoken language-whether handwritten, printed, typed, or electronically generated-and this is how the term is used in the present book. In this sense private letters, bus timetables, text messages, books are all examples of 'written text'. On the other hand, when people say 'I can't read your writing' they are referring only to handwritten (not printed or typed) text.

The writing system

Most obviously, writing is way of communicating which uses a system of visual marks made on some kind of surface. It is one kind of graphic expression (other kinds include drawing, musical notation, and mathematical formulae). In an alphabetic system, such as is found in English, the graphic marks represent, with varying regularity, individual speech sounds (or phonemes, p.248).

The standardized writing system of a language is known as its orthography. English orthography consists of the set of letters (the alphabet) and their variant forms (e.g. Capitals, lower-case), the spelling system, and the set of punctuation marks. The linguistic properties of the orthographic system can be studied from two points of view, analogous to the distinction used in spoken language between phonetics and phonology (p.248).

Graphics, a term coined on analogy with phonetics is the study of the way human beings make, transmit, and receive written symbols. However, unlike phonetics, where a comprehensive methodology for describing the properties of speech sounds has been developed, there is as yet no sophisticated graphic classification, though typographers and printers have developed a limited terminology to handle the most salient features of letter shapes. Graphology, coined on analogy with phonology, is the study of the linguistic contrasts that writing systems express. In particular, it recognizes the notion of the grapheme, on analogy with the phoneme- the smallest unit in the writing system capable of causing a contrast in meaning. For example, **because** sat and rat have different meanings, <s> and <r> emerge as different graphemes; on the other hand, the contrast between sat and sat is not graphic because the graphic difference does not **correlate** with a change of meaning. Graphemes are usually transcribed in angle brackets. Punctuation marks (such as <.> and <?>) are graphemes also, as are such units as <2>, <&>, and <\$>.

SubQuestion No : 142

Q.142

Graphemes are usually transcribed in:

1. Round brackets
2. Angle brackets
3. Square brackets
4. Brace brackets

Options 1. 1

2. 2
3. 3
4. 4

Question Type : MCQ

Status : Answered

Chosen Option : 2

Read the following passage and answer the questions:

The study of the linguistic properties of the written language has lagged somewhat behind the study of the sounds of speech. Nonetheless, the efforts of typographers, graphic designers, linguists, psychologists, and others have introduced a number of useful distinctions and terms, some of which are designed to avoid the ambiguity inherent in the apparently simple term, writing. This ambiguity arises in several ways: Writing can refer to either a process or a result: while we are actively engaged in the process, we are said to be 'writing'; and when we have finished, the product (our composition or text) is also called (a piece of) 'writing'. Writing can refer to either an everyday or a professional activity. All literate people, by definition, can write; but only a tiny minority are writers (i.e. authors).

Read the following passage and answer the questions:

“Cultural translation” may be understood as a process in which there is no source text and usually no fixed target text. The focus is cultural processes rather than products. The prime cause of cultural translation is the movement of people (subject) rather than the movement of texts (objects).

The concepts associated with cultural translation can complement other paradigms by drawing attention to the intermediary position of the translator, the cultural hybridity that can characterize that position, the cross-cultural movements that form the places where translators work, and the problematic nature of the cultural borders crossed by all translations.

There have been several prior calls for wider forms of Translation Studies, and for close attention to the cultural effects of translation.

Cultural translation can draw on several wide notions of translation, particularly as developed in social anthropology, where the task of the ethnographer is to describe the foreign culture actor-network theory (“translation sociology”), where the interactions that form networks are seen as translation, and sociologist that study communication between groups in complex, fragmented societies, particularly those shaped by migration.

The paradigm thus helps us to think about a globalizing world in which it is no longer possible to assume that their “source” and “target” sides are stable and separate.

SubQuestion No : 146

Q.146 The paradigm in cultural translation helps us to _____ .

1. Think about the Euro-centric world
2. Think about the global world
3. Think about globalizing world in which the distribution between ‘source and target’ language is insignificant
4. Think about globalizing world in which the ‘source and target’ languages are assumed unstable and inseparable

Options 1. 1

2. 2
